

Jackdaw news

Well another week has flown by in the Jackdaw class and we are now in full swing. We have explored negative numbers and place value to the thousands level over the past five days. Can you think of where we see negative numbers in the real world?

Literacy has seen us write some fantastic accounts of a residential trip where the focus was on conjunctions. In topic we continue to explore what the stone age was like and the children have been keen to find flints on the playing field, (one looked suspiciously like an arrow head. I wonder if it was).

In Science we are exploring the importance of a healthy balance with food and what the four main food groups are.

Finally, we welcomed many of you to our Maths day where you had a chance to build bead strings. It was a great day. After your departure we went on to create some amazing art using maths and the idea that straight lines can create curves.

Thank you too, to all those who popped in for a bite of cake at the end of the day. All the money raised goes to a great cause, so thanks again.

Next week:

We keep up the pace with a trip to Norwich Theatre Royal for a Proms performance on Tuesday. I will also be taking a few of the class to a Tag Rugby tournament on Thursday.

How I picture us as we prepare for the first game!

Spellings have now gone home, and we will be taking our first tests on Thursday. Please help your children with learning them and more importantly their rules. We will test on a Thursday and send out the following spellings on the Friday.
