

Jackdaw news

Well it's been a slightly different week at The Bawburgh School. On Wednesday, we saw the arrival of our new learning area kindly provided by Aviva. The children got a chance to watch possibly the hardest 3 point turn to get the bus up to its permanent resting place. Now the real fun begins. We need to come up with a design for the outside. We are asking for designs from the children and they will help inspire the finished look.

Oh and they also got a chance to go on the tractor that hauled the bus up the hill:

Maths:

We have spent the week exploring lines of symmetry and noticing the relationship between regular polygons (shapes with sides the same length) and the number of sides, edges and lines of symmetry. Can you spot anything interesting?

English:

We have arrived at the court case for poor old Roger in our book I Was a Rat and the class have been asked to persuade the reader whether Roger should be saved or not using strong and reasoned argument including rhetorical questioning. Thankfully most feel he deserves to be set free so here's hoping!

Pensthorpe trip

Jackdaws had a wonderful time visiting Pensthorpe Nature Reserve on Thursday. It was a gloriously sunny day and we got to explore different habitats including fresh water and grasslands and notice the different organisms that live there. As ever, Jackdaws were a credit to the school and you, behaving impeccably and asking excellent questions of our guide Allen.

Next week: School Holiday

As such I haven't set any homework for the holidays, however if they want to stay sharp on times tables this is good place and is most fun on a tablet/ iPad <https://www.topmarks.co.uk/maths-games/hit-the-button>. The spellings on the Thursday of our return will be a random selection from all the spellings we have set so far this year so again they are welcome to practise these too
