

# Kingfishers Newsletter

Monday 7th October

Last week we were learning...

Maths:

We have focused on adding three single digit numbers using ten frames, counters and number lines and using the language of 'first, then, then, now'

Literacy:

We have been learning about imperative verbs and their use in commands and instructions. We started to think about instructions to 'catch an alien'.

Science:

We made rocket mice with different materials to see which was most suitable and why.

History:

We learnt about Katherine Johnson; one of the first black females to work for NASA, she went on to calculate the trajectory to put Neil Armstrong on the moon.

Monday 7th October

## Next week we will be learning...

Maths: we will be looking at subtraction of single digit numbers

Literacy: We will be writing our instructions on 'how to catch an alien'

Science: we are going to test bottle rockets and make predictions on which will travel the furthest

History: We will be thinking about the footprints on the moon and doing some practical work outside.

## Reminders

Spellings will come home on a Friday and the test will be the following Friday. Please make sure books come back into school on test day. (to collect a dojo!)

Reading records should be handed in whenever books need changing but we would ask that books are always handed in on a Wednesday so we can check that children have read at least three times that week (and they can collect a dojo)!

Please record anything they are reading; home books, magazines etc It all counts!

Homework. Please could books come back in on Monday mornings please.

**\*\*PARENT LUNCH\*\***

Wednesday 16<sup>th</sup> October

Forms are being sent out this week
